SDCF SERIES BRAND CONTROL VALVE

While this valve is designed to be used with our Scotty Hydraulic Snapper Reels, it also has many other applications. Positive Flow Control with a tandem metering spool affords "precise" metering control. When locked in neutral the pump unloads to the hydraulic tank. It is preset for 6 GPM. This 4 way valve has "friction detent" which holds the control lever at any position. The valve, equipped with a long lever handle, can be used in a series of 2, 3, 4 or more of our Hydraulic Snapper Reels. **Price includes handle.**
